SUMMARY

Backend engineer with four years of experience building data-heavy web services in Python and shipping reliable APIs for e-commerce teams.

EXPERIENCE

Software Engineer, Acme Commerce *Jan 2022 – Present*

- Built order-processing services in Python and Flask that handle 2M requests per day.
- Designed PostgreSQL schemas and optimized slow reports, cutting query time by 40%.
- Containerized three legacy services and migrated them to the cloud.

Junior Developer, Brightside Labs *Jun 2020 – Dec 2021*

- Developed internal dashboards in React and exposed API endpoints for the analytics team.
- Wrote automated tests that raised coverage from 45% to 80%.

PROJECTS

Inventory Tracker

- Created a Flask web app with PostgreSQL storage for tracking warehouse stock levels.

SKILLS

Languages: Python, Java, JavaScript
Frameworks: Flask, React
Tools: Git, PostgreSQL, Linux

EDUCATION

B.S. in Computer Science, State University *2016 – 2020*
